Do you always choose the best for your child and you?

Excellent! By choosing Bebetto strollers you can be sure, that you will get the most innovative solutions that can protect you from many inconveniences. Look closer at the technologies used in suspension, functionality and safety areas. It is the attention to each detail that makes every walk a great pleasure.

SUSPENSION

Suspension is a key factor in every stroller. Innovations in this area make strolling comfortable for your child. Thanks to the technologies used in Bebetto, strolling on uneven surfaces will not disturb your child's sleep.

+ Rear shock absorber

Rear shock absorbers are adjustable and that's why you can arrange it in soft or hard mode depending on the type of surface you walk on. Regulation mechanism is really easy and it consists on the change of spring.

SAS (Shock Absorption System)

Shock Absorption System improves ride comfort – especially while riding on sett surface or approaching the sidewalk curb. Each swivel mechanism has its own shock absorber which allows them to work separately.

DMS (Direction Memory System)

The Direction Memory System is designed to remember the position which the wheel had before losing contact with the surface. When the wheels detach from the surface, they don't spin around their own axis and they won't block after touching the ground again.

+ **Soft / Hard** absorber

Side shock absorbers are great thing that maximizes comfort for your child in a stroller. You can arrange it in a hard or soft mode, which is different on a sett or even surface. Therefore – we do what we can to protect your child's sleep from disturbance.

SOFT

By setting a shock absorber in a soft position, a stroller is much more flexible, which minimalizes vibrations on a frame while the stroller is obtaining an obstacle.

HARD

Hard suspension is great while travelling on even surfaces.

FOLDING-DOWN

You can fold down the stroller to the compact size. It makes it really easy to use a stroller. There will be no problem in transporting it in a car trunk or storing it in a flat.

Plugging system

Plugging system used in Bebetto strolllers allow you to install carrycots, seat units or – after using adapters – car seats of many popular brands.

Anti finger-trap

Covered blocking system of the construction prevents you from trapping your finger while unfolding or folding the stroller.

AUTO
BLOCKER

+ Autoblocker

Autoblocker system is a solution that prevents the frame from unassisted unfolding. Mechanism blocks itself automatically and you don't need to remember about supplementary protection.

+ Easy to fold system

A handy button which is localized at the top part of the stroller frame, makes folding down really easy. To fold down the stroller you just need to arrange the wheels front-facing, squeeze the button and gently push the frame.

+ Removable bag

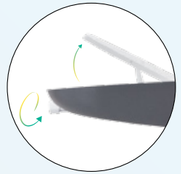
In many Bebetto models at the bottom of it there is a removable bag. Thanks to that solution you can easily empty your basket which makes folding the construction much easier.

CONVENIENCES

Bebetto strollers distinguish theirself with many handy features. This kind of details makes operating prams really convenient, protecting you from many unpleasant situations. What is worth noticing, this features are really easy to use.

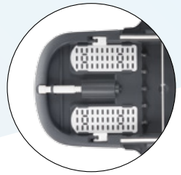
Stop&go

Curved shape of the brake pedal allows you to stop or release the lock of the stroller by gently pressing on it.



Adjustable backrest

External adjustment of a backrest in a carrycot makes it easy to put your child in a semi-lying position. To adjust the backrest you just need to swivel the external knob.



Carrycot ventilation

Grids at the bottom of carrycot provide extra air-flow in a pram. They can be regulated depending on what are the current weather conditions.

Foldable carrycot

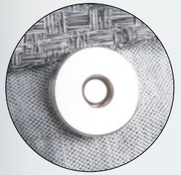
Carrycot can be folded down and thanks to that it doesn't take much place while storing it. This solution is really important when every centimeter of a cartrunk is crucial.

System UV50+

Pram fabric structure was designed to protect your child from UV Rays. Thanks to this high sun protection you can minimalize the danger of allergies and skin diseases.

Hidden axles

Hiding axles in a construction prevents from scratching other element by axles' sharp edges. This technology also protects from losing them.



Magnetic snaps

In majority of Bebetto strollers there are magnetic snaps, that makes it easy to detach and attach aprons.
This solution is used well in carrycot and in a seat unit.

Carrycot stabilization

Carrycot has a rounded bottom, which allows you to gently rock your child in it. It is great while putting your child to sleep. After unfolding four kickstands you can fully stabilize it.

ADAPTERS

Bobostello adapters let you install car seat of almost every brand on a Bebetto frame. Backlash reduction system and adjustment of an inclination angle – those are really innovative factors which let you transport your child in an optimal position (lying – for a child up to 6 months old, and seating – for a child that can seat independently).

STANDARD EQUIPMENT

Bebetto products are equipped with many practical accessories. They surely expand the functionality of a stroller that make strolling much easier. Capacious changing bag with design corresponding to the stroller colours or thermal mug holder are just the examples that make everyday usage really convenient.

Changing bag

The large capacity provides you an easy access to essential baby changing accessories.

Cup holder

Keeps your favourite drink within reach.

Mosquito net

Protects your baby from mosquitoes and flying insects, ventilation holes allow fresh air to circulate.

PVC rain cover

Highly transparent rain cover protects your child during rainy days.

ADDITIONAL EQUIPMENT

Aside from the standard equipment, we also offer many additional accessories of Bobostello brand. All elements are perfectly matched to all the Bebetto models.

Wheel covers

Protect your floor out of dirt after coming home from outside.

Umbrella

Available in a wide range of colours matched to each stroller model.

Set of lights

Attachable to the stroller to increase visibility at night and in the dark.

Car seat

Available in a wide range of colours matched to each stroller model.
