# Stability, agility, functional features and wide range of configurations

Standard version comes with 2 carrycots and 2 seats.  
Sport version comes with 2 seats, with an option to upgrade with a carrycot.

## Carrycot

(optional for the Bebetto42 Sport)

# #CALMNESS

For your child every walk is a really important event. That's why you don't want to think about operating a pram, but all you want to do is to spend quality time with your kid and allow him to explore the world

around him. In Bebetto we are fully aware about that and we do all that we can to make every walk a real pleasure for you and your child.

## UV50+

Pram upholstery structure was designed to protect your child from UV rays.

## Ventilation

Ventilation net in a carrycot allows to transfer the warm air out from the stroller.

◀ NITELLO 03

## Aluminium

Aluminium frames in Bebetto strollers combine solidity and light weight.

## Hidden Axles

Hidden Axles system allows you to hide them in a frame, that protects you from losing them or scratching other elements.

NITELLO 04 >

**Thanks to the technologies used in Bebetto, strolling on uneven surfaces will not disturb your child's sleep.**

## Hood

Thanks to the hood adjustment you can protect your child from cold wind and high sun.

## Ventilation

Ventilation net allows an extra air flow in a stroller. Furthermore it is an extra window that lets you keep an eye on your child.

## Crotch belt

By detaching the crotch belt you can put your child in a convenient position.

## Footrest

Footrest is adjustable, which allows you to put your child in the most comfortable position

## INNOVATIONS

Non-pneumatic wheels are currently used in chosen models (Torino, Nitello, Tito SHINE, Bebetto42)

## Soft / Hard absorber

Side shock absorbers are great thing that maximizes comfort for your child in a stroller. You can arrange it in a hard or soft mode, which is different on a sett or even surface. Therefore – we do what we can to protect your child's sleep from disturbance.

## Rear shock absorber

Rear shock absorbers are adjustable and that's why you can arrange them in soft or hard mode depending on the type of surface you walk on. Regulation mechanism is really easy and it consists on the change of spring.

## SOFT

By setting a shock absorber in a soft position, a stroller is much more flexible, which minimizes vibrations on a frame while the stroller is obtaining an obstacle.

## HARD

Hard suspension is great while travelling on even surfaces.

**Suspension is a key factor in every stroller. Innovations in this area make strolling comfortable for your child.**

### ▪ SAS (Shock Absorption System)

Shock Absorption System improves ride comfort – especially while riding on sett surface or approaching the sidewalk curb. Each swivel mechanism has its own shock absorber which allows them to work separately.

### ▪ DMS (Direction Memory System)

The Direction Memory System is designed to remember the position which the wheel had before losing contact with the surface. When the wheels detach from the surface, they don't spin around their own axis and they won't block after touching the ground again.

### ▪ FLEXY WHEELS

Flexy Wheels is the completely innovative solution. Thanks to that you don't need to worry about the air pressure in the tires – they always have stable shape. Their weight and flexibility doesn't differ from pumped wheels. Flexy wheels are prevented from puncture.

## HIDDEN AXLE

Hiding axles in a construction prevents from scratching other element by axles' sharp edges. This technology also protects from losing them.

# SUSPENSION

## Plugging system

Plugging system used in Bebetto strollers allow you to install carrycots, seat units or – after using adapters – car seats of many popular brands.

## ANTI FINGER-TRAP

Covered blocking system of the construction prevents you from trapping your finger while unfolding or folding the stroller.

## AUTOBLOCKER

Autoblocker system is a solution that prevents the frame from unassisted unfolding. Mechanism blocks itself automatically and you don't need to remember about supplementary protection.

## EASY TO FOLD SYSTEM

A handy button which is localized at the top part of the stroller frame, makes folding down really easy. To fold down the stroller you just need to arrange the wheels front-facing, squeeze the button and gently push the frame.

# FOLDING-DOWN

CONVENIENT

### STOP&GO BRAKE

Curved shape of the brake pedal allows you to stop or release the lock of the stroller by gently pressing on it.

### MULTICOMFORT

Bobostello adapters let you install car seat of almost every brand on a Bebetto frame. Backlash reduction system and adjustment of an inclination angle – those are really innovative factors which let you transport your child in an optimal position (lying – for a child up to 6 months old, and seating – for a child that can seat independently).

**Bebetto strollers distinguish themselves with many handy features. This kind of details makes operating prams really convenient, protecting you from many unpleasant situations.**

#### Removable bag

In many Bebetto models at the bottom of it there is a removable bag. Thanks to that solution you can easily empty your basket which makes folding the frame much easier.

#### Foldable carrycot

Carrycot can be folded down and thanks to that it doesn't take much place while storing it. This solution is really important when every centimeter of a cartrunk is crucial.

#### Adjustable backrest

External adjustment of a backrest in a carrycot makes it easy to put your child in a semi-lying position. To adjust the backrest you just need to swivel the external knob.

#### Magnetic snaps

In majority of Bebetto strollers there are magnetic snaps, that makes it easy to detach and attach aprons. This solution is used well in carrycot and in a seat unit

#### Carrycot ventilation

Grids at the bottom of carrycot provide extra air-flow in a pram. They can be regulated depending on what are the current weather conditions.

#### Carrycot bottom

Carrycot has a rounded bottom, which allows you to gently rock your child in it. It is great while putting your child to sleep. After unfolding four kickstands you can fully stabilize it.

#### System UV50+

Pram fabric structure was designed to protect your child from UV Rays. Thanks to this high sun protection you can minimize the danger of allergies and skin diseases.

## Changing backpack

Its large capacity provides you an easy access to essential baby changing accessories (not available in Nico).

## Cup holder

Keeps your favourite drink within reach.

## Mosquito net

Protects your baby from mosquitoes and flying insects, ventilation holes allow fresh air to circulate (not available in Nico and B42 Sport).

## PVC rain cover

Highly transparent rain cover protects your child during rainy days.

# STANDARD EQUIPMENT

Bebetto products are equipped with many practical accessories. They surely expand the functionality of a stroller that make strolling much easier.

**Aside from the standard equipment, we also offer many additional accessories of Bobostello brand. All elements are perfectly matched to all the Bebetto models.**

#### **Car seat**

Provides comfort and safety for your child while travelling in a car.

#### **Wheel covers**

Protect your floor out of dirt after coming home from outside.

#### **Umbrella**

Effectively protects from high sun while strolling.

#### **Set of lights**

Attachable to the stroller to increase visibility at night and in the dark.
